

General Information for the case study:

WRL reference	M02 D01	
Module	M02 Animal Behaviour	
Data Set	DO 2 Interspecific differences in fiddler crab feeding rates	
Research questions	1. Do feeding rates differ between species? 2. Do feeding rates differ among the same species living at different tidal heights?	
Keywords	Adaptation; behaviour; interspecific competition; error bars; ecosystem; feeding; habitat; mangroves; niche; sampling; selection; statistics; standard deviation; transects
